Preface

Thank you for purchasing UGREEN products. For optimum operation, please read the manual carefully before using.

Package Contents

1 × USB Network Print Server

1 × Power Adapter

1 × User Manual

1 × Warranty Card

Product Overview

Indicator	Function	Status
POWER	Power Indicator Light	5465 Ethernet connected 5465 Power disconnected
Wi-Fi	Wi-Fi Status Light	5465 Power connected 5465 Power disconnected
WLAN/LAN	Ethernet Cable Signal Light	5465 Wi-Fi connected 5465 Ethernet connected 5465 Ethernet disconnected 5465 Data transferring

Before Use

* Make sure that your printer others were installed and the network works normally when connected by your local computer.
* The Wi-Fi icon is not available for the USB 2.0 port. For example, it is not available for the USB 2.0 port. For example, it is not available for the USB 2.0 port.

Setting the Product's IP Address

Step One: Find and Record the Router's IP Address (Windows users)

Click on **Network** in the left sidebar, then click on the **Router** tab in the top right corner. The router's IP address will be displayed in the **Router** section.

Step Two: Connect to the Product's Wi-Fi

- Connect the product to power supply. The Wi-Fi will be activated after 1 minute when the Wi-Fi indicator lights on.
- Click on the Wi-Fi icon in the top right corner of the product's screen. The Wi-Fi will be activated.
- Click on the Wi-Fi icon in the top right corner of the product's screen. The Wi-Fi will be activated.

Step Three: Connect to the Product's Wi-Fi

- Connect your smartphone to the product's Wi-Fi.
- Click on your phone's browser and input "192.168.1.1" into the browser to enter the product's web page.
- Click on the **Network Settings** tab in the top right corner of the product's Wi-Fi address page (Page 21-24).
- Click on the **Wi-Fi** tab in the top right corner of the product's Wi-Fi address page (Page 21-24).

Except the router's IP address, the gateway can also be found under "Control Panel/Network and Internet/Network Connection".

Notice:
For macOS users, please click on the icon "Wi-Fi" select "Network Preferences". Then click the "Advanced" button in the bottom right corner to see the gateway address.

Two Step Two: Connect to the Product's Wi-Fi

- Connect the product to power supply. The Wi-Fi will be activated after 1 minute when the Wi-Fi indicator lights on.
- Click on the Wi-Fi icon in the top right corner of the product's screen. The Wi-Fi will be activated.
- Click on the Wi-Fi icon in the top right corner of the product's screen. The Wi-Fi will be activated.

Step Three: Connect to the Product's Wi-Fi

- Connect your smartphone to the product's Wi-Fi.
- Click on your phone's browser and input "192.168.1.1" into the browser to enter the product's web page.
- Click on the **Network Settings** tab in the top right corner of the product's Wi-Fi address page (Page 21-24).
- Click on the **Wi-Fi** tab in the top right corner of the product's Wi-Fi address page (Page 21-24).

Except the router's IP address, the gateway can also be found under "Control Panel/Network and Internet/Network Connection".

Notice:
For macOS users, please click on the icon "Wi-Fi" select "Network Preferences". Then click the "Advanced" button in the bottom right corner to see the gateway address.
